Objective: Seeking a full-time position as a deckhand/or personal trainer onboard a charter motor yacht.

Through my experience the last few years – Professional rugby player in South Africa, Argentina, France and Dubai, personal training, construction, working onboard cruise ships, teaching English in Vietnam, and now yachting for 2 seasons. I am self-motivated, proactive, and very goal oriented. I have attention to detail, excellent communication skills and well-rounded in being hospitable in an array of environments. I believe I am a valuable asset to any team where I can enhance my educational and professional skills in a stable and dynamic workplace. I am a Jack of all trades and willing to help wherever I can. I am comfortable and confident in driving tenders and jet skis.

I have held various leadership roles throughout my educational career, from being the captain of my rugby teams to mentoring and leading younger students. Learning to me is an ongoing process that I love to embrace. I love working with people in general. I have years of experience in the sport and fitness industry – which has taught me the importance of discipline. With my cruise ship and yachting experience, I am no stranger to the ocean or challenging work. Now I am looking to grow even more professionally within the yachting industry.
